

AGRISTIX

Introduction

Foliar fertilizer application is being increasingly used for feeding plants. It is very useful and an efficient way to quickly correct nutrients deficiencies. It has been noticed that foliar fertilization can increase yield, resistance to diseases & pests, improve drought tolerance and enhanced quality of produce. However, its efficiency and effect largely depend on the time of application and fertilizers stay (evaporation time) on leaves/stem. To prolong evaporation time and uniform spread of liquids, sticker play an important role.

AGRISTIX is designed for use in all foliar applications including nutrients & supplements, because of its mild and organic nature. AGRISTIX do not cause burning if slightly overused. This unique and economical Agrisol formulation is very gentle on crops and did not leave harsh residue on foliage.
